FLEXIBLE AUTOMATION & ROBOTERTECHNOLOGIE

**YOUR PARTNER FOR
INDUSTRIAL MATTERS**

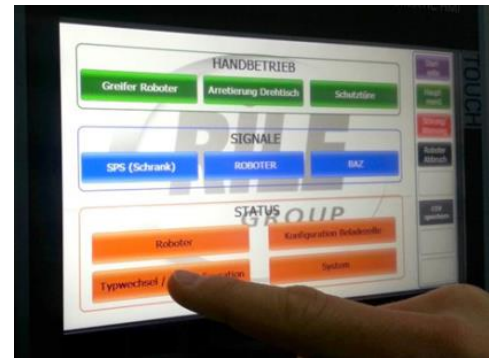

Produkt-Infos

Loading/unloading of a 5-axis milling machine with our **mobile loading cell**

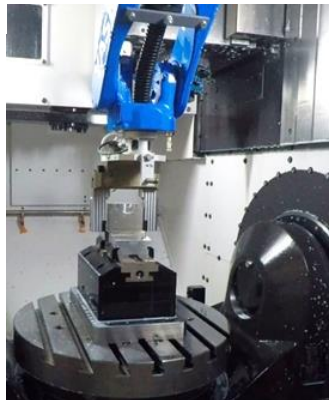

THE CONTROLLER
Everything at a glance

HIGHLIGHTS of this automation solution

- + **Short changeover times**, thanks to flexible attachments
- + **Flexible & easy retrofitting** of new components
- + **Main time parallel** loading/unloading and set up possible
- + **Effective & short term response** to new orders
- + **Small installation surface** required
- + **Universally applicable** to various CNC-machines
- + **Mobile & compact**, can be transported quickly and easily using a pallet truck
- + **Plug & Play operation**
- + **Everything from a single source**, from the interface to putting into operation

HIGHLIGHTS

- + **User-friendly visualization**
- + System operation **without robot control**
- + **Standardized**, menu-driven programming
- + **Quick & easy** programming
- + **No special robot knowledge** necessary
- + **Main time parallel programming** of new components

worker & robot work simultaneously at the cell
